6 INPUT/OUTPUT EXPANSION BOARD. FOR SMARTLOOP CONTROL PANELS

SMARTLOOP

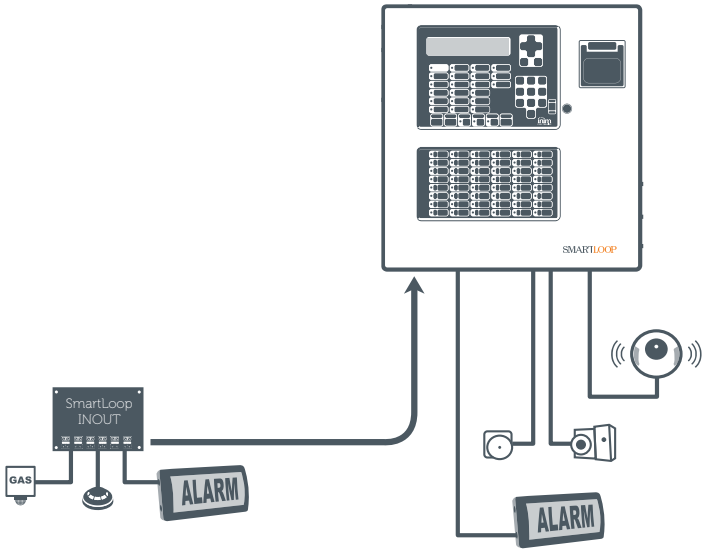

The SmartLoop/INOUT expansion board adds a further 6 terminals to the control panel.

Each terminal can be configured as:
- Supervised output (NAC output – 1A max.)
- Supervised input
- Conventional detectors input line
- 4-20 mA gas detector line

The output trigger signals and the actions generated by the activation of the inputs are fully programmable.

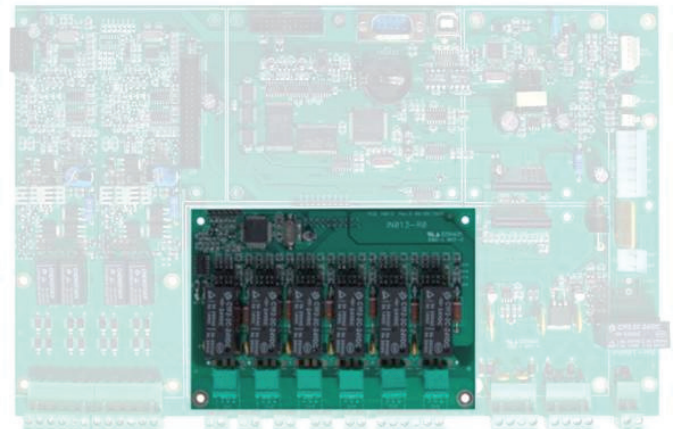

MAIN FEATURES

- Supported by SmartLoop control panels
- Adds 6 individually configurable I/O lines
- 1 board for each control panel

INSTALLATION

The board comes with supports which screw into the motherboard.
The board plugs directly into the motherboard.
