Features

ipcolor STREAM—Enjoy the Visual and Aural Feast with Low Latency

ipcolor STREAM is a new compression technology which maintains the original signals quality as authentic as possible by maximizing the reduction of data loss during the transmission process with low latency and strong anti-interference.

4K@60Hz UHD Wireless Transmission for 20 Meters line of sight

Supports maximum resolution 4K@60Hz input and output to maintain original signals quality. Enjoy ultra HD streaming from your laptop or other HDMI devices to your TVs or projectors.

Channel Switchable, High Anti-interference, Easy Pairing

Adopting Wi-Fi encryption, auto SSID pairing and switchable channels by pressing button on TX/RX to avoid mutual interference. Multiple sets of products can work smoothly in the same room.

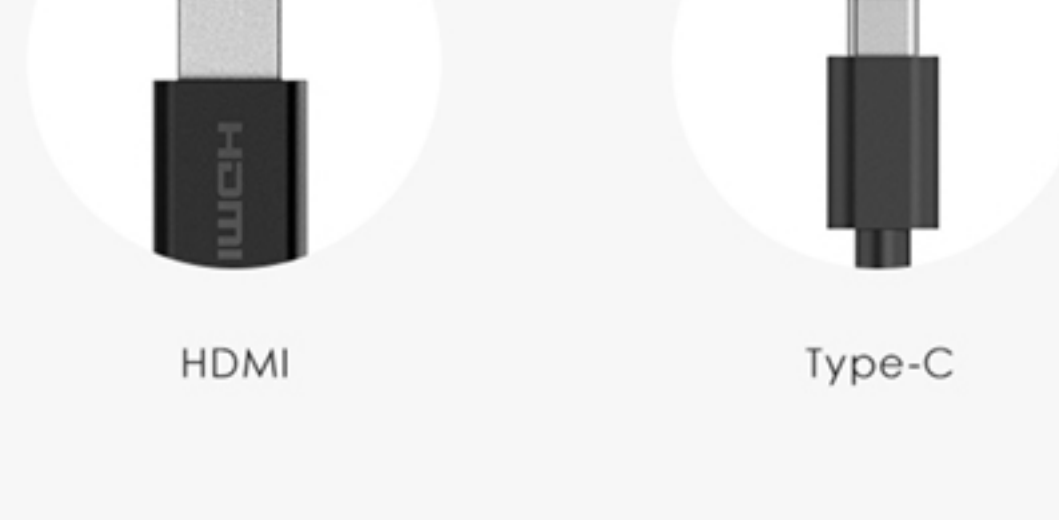

laptops/tablets/mobile phones and other devices

Flexible and Portable, Plug and Play

Supports HDMI/Type-C interface types, flexible adapts to laptops/tablets/mobile phones and other devices. No extra App or software needed, easy connection through plug and play. With the mini design, it's light and portable.
